Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-84 and 100, drawn to a device for injecting bone cement and method of use, classified in class 606, subclass 93.
- II. Claims 85-99, drawn to a bone cement composition and method of use, classified in class 523, subclass 117.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the device can be used for injecting generic bone cement compositions that do not have a contrast agent and the claimed bone cement composition can be used with other injectors or no injector at all. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

If applicant selects the first invention, drawn to a device for injecting bone cement, then applicant is further required to elect a single species for examination according to the following Election of Species requirement.

Art Unit: 3732

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species IA - Dispenser with Lever Mechanism 41 and porous reservoir mixing disk 13
- Species IB - Dispenser with Lever Mechanism 41 and reservoir mixing blade 80
- Species IC - Dispenser with Lever Mechanism 41 and spring loaded reservoir (Fig 4-6)
- Species IIA- Dispenser with Screw Mechanism 60 (Figure 3) and porous reservoir mixing disk 13
- Species IIB - Dispenser with Screw Mechanism 60 (Figure 3) and reservoir mixing blade 80
- Species IIC - Dispenser with Screw Mechanism 60 (Figure 3) and spring loaded reservoir (Fig 4-6)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3732

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Notice Regarding Joint Inventors

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Ralph Lewis at telephone number (703) 308-0770. Fax (703) 872-9302. The examiner works a compressed work schedule and is unavailable every other Friday.
